

## WORDS OF THE AMSHINOVER REBBE

When many Jews perform a *mitzvah* together, the effect is greater than when a single Jew does the same *mitzvah* over and over again the same number of times. This is due to the unification of souls of Israel that comes about when many perform the *mitzvah* together. An example of this is when an individual can say the entire book of *Tehillim* by himself or join a group which divides *Tehillim* up among them and says it together. The latter is infinitely greater.
